DESALINATION

Desalination

Ministry of Earth Sciences has successfully commissioned the Low Temperature Thermal Desalination Plant (LTTD) at Kavaratti, Minicoy & Agatti which is supplying drinking water with a capacity of 0.1 million liters per day to the local community in Lakshadweep Islands since 2005. The surface sea water at about 28-30 degrees Celsius is sent to a low pressure flash chamber where it instantaneously evaporates under vacuum. The generated vapour is then sent to a condenser where it condenses to water using colder deep sea water at about 12-13 degree Celsius drawn from a depth of 1000 m.
