With regards to flora, there are no endangered plant species in Indian Sea water, though two seaweed (Algae) species namely 1. *Gelidiella aerea* (Forssk.) J. Feldman - Gelidiellaceae and 2. *Gracilaria edulis* (S.Gmel) P.C. Silva - Gracilariaceae, growing along the Tamil Nadu coast (near Mandapam) which are being exploited for Agar Agar preparation

- (b) There are at least 120 species of marine mammal found in the world, and a fourth of these may be found in India and adjacent countries. The marine mammals, a diverse group are primarily ocean-dwelling or depend on the ocean for food. They include the cetaceans (whales, dolphins, and porpoises), the sirenians (manatees and dugong), the pinnipeds (true seals, eared seals and walrus), several otters (the sea otter and marine otter) and the polar bear. There are often vulnerable or endangered due to a history of commercial exploitation for blubber, meat. A list of species are annexed.
- (c) Step taken by the Government to intensify wildlife conservation efforts are as follows:
- Hunting and commercial exploitation of wild animals included in various schedules of the Wild Life (Protection) Act, 1972 is prohibited. Offences committed in respect of these species attract punishment prescribed under the Act.
  - The Wildlife Crime Control Bureau has been set up to strengthen the enforcement of law for control of poaching and illegal trade in wildlife and its products.
  - Protected Areas, viz., National Parks, Sanctuaries, Conservation Reserves and covering important wildlife habitats have been created all over the country under the provisions of the Wild Life (Protection) Act, 1972 to conserve wild animals and their habitats.
