

Ms. Madhuri Musale

Ms. Madhuri Musale joined India Meteorological Department (IMD) in May 1997 and at present is working as Scientific Assistant in the Climate Monitoring and Prediction Group of O/o Climate Research & Services, IMD Pune. During her around 23 years of service, Ms. Madhuri has been actively involved in the operational and research activities related to long range forecasting. She has significantly contributed in the development of IMD's various statistical models for the long-range forecasting and preparation of operational forecasts. She is a part of the team that prepared new normal dates of onset & withdrawal of southwest monsoon based on recent data, which have been now implemented for operational services. Ms. Madhuri is also involved in the activities of WMO recognised Regional Climate Centre, Pune. She has co-authored number of research reports and papers.
